INDIVIDUAL MDAs
OPPORTUNITIES AND CHALLENGES

• Opportunity for building Partnership at all levels (CSOs inclusive)

• Opportunity for Dialogue both at the National and local levels: Migration occurs in the street; its about individuals and their families living in the local Community where inequalities, discrimination, poverty, climate change and all other goals of the SDGs can be experienced...the platform for Migration Dialogue should be located on the street

• Challenge: Poor coordination: the challenge is just simply that different institutions have different mandates and sometimes operate in isolation thereby creating gaps for a common understanding or a holistic approach to dealing with a cross cutting issue like migration

• Institutional and Technical Capacity: Need to develop SOPs for institutional operation

• Mainstreaming is a long process and requires a deliberate and systematic approach: Development does not occur by accident...
